AMENDMENTS TO THE SPECIFICATION

Please amend the paragraph on page 1, lines 6-10, as follows:

Cross-Reference To Related Applications

This application is a continuation of pending application Serial U.S. Patent

Application No. 09/915,572, filed August 26, 2001 July 27, 2001, which claims the benefit under 35 U.S.C. § 119(e) of U.S. Provisional Patent Application No. 60/221,518, filed July 28, 2000.

The entire content of these applications are expressly incorporated herein by reference thereto.

Please amend the paragraph on page 8, lines 22-30, as follows:

Referring to FIG. 13, a transverse bar 66 is shown which may be used <u>as a connector or connecting member</u> to secure the longitudinal member 18 to a fastener 12 that is laterally displaced from the longitudinal member 18 to avoid excessively bending the longitudinal member 18. The transverse bar 66 includes a hook 130 at one end 132. A set screw 134 extends through the hook 130 and pins the longitudinal member 18 against the inner surface 136 of the hook 130 to secure the longitudinal member 18 to the transverse bar 66. The second end 138 of the transverse bar 66 is a shaft that has ridges 65 around the circumference that mate with serrations 59 provided in attachment member 14 as described above.
